

## Release notes for Capture One LE 3.7.10 for Windows

February 2010

### What's new in Capture One LE 3.7.10

#### Solved issues

- Fixed bug that will cause the software to expire.

#### New camera support

- Leica DIGILUX 3
- Fuji S5
- Nikon D40
- Pentax K10D, K100D
- Olympus E-400

#### Improved camera support

- Leica M8
  - New profile for use with the IR cut-off filter
- Canon 1D MK II N
  - Updated color matrix for more correct color renditions

#### Known issues

- Processing to scale factors at 120-170% may present artifacts in sub pixel details
- Occasional a green line through part of the image can be seen in Olympus E-500 images. Appears in the preview and in the developed image
- Images restored from trash cannot be processed
- The image output dimensions can on some cameras be a little smaller than the dimensions supplied by the camera manufacturer. This will result in a slightly smaller image when developed. An example of this could be the Canon EOS 300D / Rebel, when you output the full image in Capture One the dimensions are 3072 x 2040 where as the Camera specification says 3072x2048. Currently no work around

#### RAW file support

RAW files from the following cameras are supported in Capture One LE:

##### Canon:

- 1D Mark II N, 1Ds Mark II, 1D Mark II, 1Ds, 1D
- 5D, 30D, 20D, 10D, 400D/Rebel XTi, 350D/Rebel XT, 300D/Rebel, D60, D30
- Pro 1, G6, G5, G3, G2

##### Nikon:

- D2Xs, D2X, D1X, D2Hs, D2H, D1H, D200, D100, D80, D70s, D70, D50, D40

##### Fuji:

- S5 Pro, S3 Pro, S2 Pro

##### Pentax:

- K10D, K100D, \*istDL2, \*istDL, \*istD, \*istDS2, \*istDS

##### Olympus:

- E-400, E-500, E-1, E-10, E-20, E-330, E-300
- C-7070, C-8080

##### Konica Minolta:

- Alpha 5 D / Maxxum 5 D / Dynax 5 D

- Alpha 7 D / Maxxum 7 D / Dynax 7 D

Leica

- M8, DIGILUX 3, Digital Module R for R8 and R9 cameras

Sony

- $\alpha$  (alpha) DSLR-A100, DSC-R1

### **Downloading**

Before downloading Capture One, make sure your computer meets the following system requirements:

- Pentium III or faster
- Operating system: Windows XP or Windows 2000
- 512 MB of RAM or more (2 GB or more recommended when used with Phase One P-backs)
- At least 2 GB of free disk space

Phase One provides Capture One in the following languages: English, German, French, Italian, Spanish, Japanese, Chinese (simplified), Chinese (traditional), Swedish, Czech, Dutch, Portuguese and Korean.

On Windows 2000 and XP the traditional Chinese version can only be run in a true traditional Chinese environment. At this time you cannot run a mixed English and Chinese environment.

To get the latest version of Capture One, visit:

<http://www.phaseone.com/download>

### **Installing**

Before you install, make sure your system date and time is set correct. The Capture One trial mechanism can expire if you move your system date backwards after installing Capture One. There is no way to re-enable your trial period if you change your date after installing Capture One.

If you install into an existing installation of Capture One, it is recommended that you take a backup of your settings before installing the new version.

To begin the installation, unzip the downloaded package and click SetupXX.exe (where XX is either PRO, DB or LE). If you are installing from a CD or DVD you do not need to unzip anything. Make sure you have administrative rights when you install Capture One.

### **Links and resources**

Here is a list of useful web links where you can also get information about Capture One and digital photography:
